

AI for Everyone

Welcome to the community workshop!

Trevor Bailey – Northeast Community College

What is AI?

Artificial Intelligence = using computers to recognize patterns and make predictions.

Everyday Examples

- Google Maps traffic
- Netflix recommendations
- Spam filters
- Siri / Alexa

Prompting 101

Bad: Write an email.

Better: Write a polite 3-paragraph email to my landlord about fixing a leaking sink.

Key Takeaways

- AI is already part of daily life.
- Clear prompts = better results.
- Always verify information.
